***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species (claim 47 is generic):

- I. The inputted information relates to a condition of the air conditioning.
- II. The inputted information relates to a condition of the navigation system
- III. The inputted information relates to a condition of the music module
- IV. The inputted information relates to a condition of the telephone module
- V. The inputted information relates to a condition of the acoustic output device

Note that claim 47 appears to be generic.

2. Upon election of I, II, III, IV, or V, the applicant is further required under 35 U.S.C. 121 to elect on of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, claim 48 is generic):

- A. The outputted information relates to a condition of the engine rpm
- B. The outputted information relates to a condition of the oil pressure
- C. The outputted information relates to a condition of the coolant temperature
- D. The outputted information relates to a condition of the vehicle tilt
- E. The outputted information relates to a condition of the distance to the obstacle

- F. The outputted information relates to a condition of the interior temperature
- G. The outputted information relates to a condition of the geographical location of the vehicle
- H. The outputted information relates to a condition of the vehicle doors
- I. The outputted information relates to a condition of the time
- J. The outputted information relates to a condition of the telephone book entry
- K. The outputted information relates to a condition of the music title

Note that claim 48 appears to be generic.

It should be noted that if the Applicant is of the persuasion that the inventions are obvious variants, Applicant should state so for the record; this would negate the above restriction requirement.

3. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JONATHAN M. DAGER whose telephone number is (571)270-1332. The examiner can normally be reached on 0830-1800 (M-F).
